(1)For years 2000 and later, the race categories White and Black exclude Hispanic workers.

(2)The primary source of injury identifies the object, substance, or exposure that directly produced or inflicted the injury.
For transportation incidents, the source identifies the vehicle in which the deceased was an occupant.

(3)The secondary source of injury, if any, identifies the object, substance, or person that generated the source of injury or that contributed to the event or exposure.
For vehicle collisions, the deceased's vehicle is the primary source and the other object (truck, road, divider, etc.) is the secondary source. For most homicides,
the "bullet" is the primary source and the "perpetrator" is the secondary source.

NOTE: Dashes indicate no data or data that do not meet publication criteria. Totals for major categories may include subcategories not shown separately.

Data for 2002 are preliminary; data for previous years are final.
