Collecting Samples for Arsenic

Step 1 Locate a sampling tap near the well. Bathroom, kitchen or pressure tank taps are good locations.

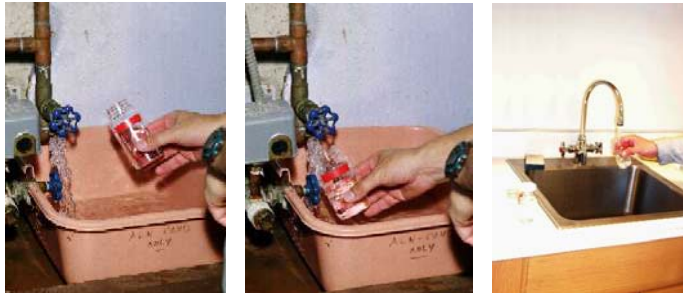

Step 2 Do NOT use a leaky tap or outside tap.

Step 3 Remove the tap screen or aerator if sampling from a standard household tap.

Step 4 Remove sample bottles from Styrofoam shipper. Remove sterility seal. Do NOT touch top of bottle or the inside of the cap.

Step 5 Let the cold water run for 5 minutes. Do NOT change the flow rate, or shut off the tap or wipe end of tap or bump the neck on swing faucets. Fill the bottle and securely tighten cap.

Step 6 Write your name on the side of each sample bottle with a waterproof pen. Complete the lab test request form with a ballpoint or waterproof pen. Remember to fill in the collection date and time and answer the questions.

Step 7 Place sample bottle in a zip-lock bag. Do NOT put request form in the bag. Squeeze out excess air. Close zip-lock bag.

Step 8 Place samples and request form in shipper. Place return mailing label on the outside of the shipper. Secure shipper with rubber bands and mail.

Kit content:

- Styrofoam shipper
- 1 Sterile bottles
- Test request form
- 1 Zip-lock bags
- 2 Rubber bands
- U.S. Mail return label
- Priority Mail label
- Commercial Carrier return label
