Policy on Reanalysis of Exome Data: WSLH Cytogenetic and Molecular Genetics Laboratories will reanalyze original exome data (FASTQ) upon request. WSLH will provide one free-of-charge reanalysis within five years of the time testing was originally performed. Reanalysis will focus on primary findings only; therefore, no carrier status or secondary findings will be updated. An amended report will be issued to the original ordering provider within 2-4 weeks of the request.

Exome reanalysis requests can be made by faxing (608-265-7818) or emailing (cytogenetics@slh.wisc.edu) a completed Exome Reanalysis Request Form to our laboratory. The Request Form must contain the following information:

- Date of request
- Patient name
- Case (CYG) number
- Additional clinical findings or latest clinic note
- Name and contact number of provider initiating reanalysis request

Please call our laboratory with additional questions 608-262-0402
