2022-23
Fee Schedule
Effective August 1, 2022
Prices subject to change without notice.
WOHL Sampling Guide

For specific sampling guidelines, please refer to the current Sampling Guide. You can access it from our homepage at www.WOHL-lab.com.

Many other types of analyses are offered which are not listed in this fee schedule. Please call the laboratory for details and prices. Some of these analyses may require a minimum of 3 samples. If fewer than 3 samples are received the client will be billed for 3 samples.

Sampling Media Charges

Sampling media costs are included in the listed price with the following exceptions:

Passive VOC Monitors
Assay 525 Badge (128) $15.00
Assay 566 Badge (128.1) $13.00
Air-O-Cell Cassette (139) $5.00
PPI Impactors 2 lpm (175) $24.00
PPI Impactors 4 lpm (179) $24.00

Passive VOC Monitors
OVS-2 and OVS-7 Tubes (4, 116) $13.00
OVS TENAX Tubes (117) $19.00
DNPH Seppak (138) $13.00
UMEX 100 Badge (167) $13.00

These costs are in addition to any charges for analysis. Tests that have additional media charges are marked with an “*”.

Equipment Loans Available

The lab maintains equipment for the use of our clients who test only occasionally. The program is free for our clients; however, not all equipment may be available at any given time. If you sample frequently or need a large amount of equipment, please consider purchasing your own.

When ordering equipment, please be prepared to give us the flow rate so that we can calibrate the pump(s).

Outgoing, domestic, non-rush shipping of pumps and samplers is free. Any rush shipping charges will be paid by the client. You should request your equipment to be received close to the day of sampling and use and return it as soon as possible so that others may use it.

The customer pays all shipping charges for Anderson Samplers. Overnight shipment recommended.

Air-O-Cell sampling pump
Andersen N6 sampler
Field rotometers
High Volume (10-20 lpm) pumps
MSA Dorr-Oliver cyclones
Personal sampling pumps & accessories
WallChek sampler
Aluminum cyclones
**Accelerated Service Procedure**

WOHL offers accelerated service levels: SAME DAY, RUSH or PRIORITY. Requests for these services must be prearranged before shipment of samples by calling **(800) 446-0403 or (608) 224-6210**. Requests for accelerated service without prearrangement will be handled as accelerated samples, but no guarantees will be made as to length of turnaround time.

**Levels of Service/Turnaround Time**

**NORMAL**: The fee is the listed price. Turnaround times (TAT) vary with sample type and quantity. Average turnaround is five to ten working days. Samples are usually analyzed in order of receipt or scheduled for most efficient analysis.

**PRIORITY**: The fee is 1.5 times normal sample price. Priority analysis must be **prearranged** with the analyst. Usual PRIORITY turnaround time (TAT) is two to three working days.

**RUSH**: The fee per sample is 2 times the normal sample price. Analysis must be **prearranged** with the analyst. Usual RUSH turnaround time (TAT) is one to two working days.

**SAME DAY**: This level of service is only available for a limited number of analyses. Primary tests are: spore traps, tape lifts and asbestos. Please call lab to see if same day analysis is available.

Our working days are Monday through Friday excluding holidays.

WOHL strives to provide the fastest turnaround possible for all specimens, but some factors affect the availability of accelerated service, including:

- Number of samples. Large quantities take longer to finish.
- Type of sample. Certain sample types take longer to analyze.
- Number of requests per sample. Samples with multiple analyses will take longer.
- Prearrangement. Phoning ahead can place an accelerated order on your samples.

**Sample and Data Retention Policy**

Our policy is to retain records for the period of time required by our accreditations and by law. Contact the lab to make arrangements for extended storage or transfer. Retention times for samples are as follows:

- Bulk Asbestos 1 year
- Total Weight Filters 1 year
- Air Asbestos Filters 1 year
- Desorbed Air Samples only until results reported
- Other Bulk Samples 1 year
- ECOC Filters 1 year

Page 2
Blank Submission Policy

The Wisconsin Occupational Health Laboratory strongly recommends submitting blank sampling media with all types of samples. Blanks added by the lab only correct for background levels of analyte on the media as a result of the manufacturing process and will not correct for additional contamination during handling by the client or shipping. Therefore, please include your own blank when submitting samples. The charge for blanks will be the same as for regular samples as they are analyzed identically.

Minimum Number of Samples

There is no minimum number of samples required for the most common types of analyses. However, for some difficult analyses, there is a three sample minimum. Those analyses requiring a three sample minimum are marked with a “③”. If fewer than 3 samples are received, the client will be billed for 3 samples.

Shipping Charges

WOHL uses UPS as its standard courier. There is no charge for shipping supplies by UPS ground within the United States. Other than outgoing overnight shipments for media that must be kept cold, all next day, second day, and international shipment charges will be billed to the customer. Clients will also be billed for shipping agar plates overnight.

Customer Service

Our customer service team can help you order, plan sampling strategies, and interpret reports. Call us at 800-446-0403 or (608) 224-6210. To get the fastest response to your needs, please inform the office staff of the type of assistance you need. They will put you in touch with the staff member who can best meet your needs. You can also email us at the following addresses:

   Lab Director ......................WOHLdirector@slh.wisc.edu
   Customer Service .................WOHLservice@slh.wisc.edu

Billing Information

Invoices are issued at the beginning of the month following completion of testing and/or other charge such as media or shipping. Full payment is due within 30 days from date of invoice.

Submission Information

A submission form is required with all samples. WOHL submission forms are available on our website at www.wohl-lab.com. Please make sure to send a legible physical form with your samples. Please fill out the billing section with the specific, current company name along with the contact information for the person(s) who should be receiving the results report. We issue our reports in pdf format by email.

Any combination of the following metals may be included in a multi-component analysis:

Al, As, B, Ba, Be, Bi, Ca, Cd, Co, Cr, Cu, Fe, Li, Mg, Mn, Mo, Ni, Pb, Sb, Se, Sn, Sr, Ti, Tl, V, Zn

If **heat** is involved in the process and oxides are required, please request a **fumes analysis**. Also, not all oxides are soluble per our scan method. Please contact the lab if your oxide is not listed here: CaO, Fe₂O₃, MgO, ZnO,

First component 38.00
Each additional component 8.00
add additional for bulk prep 10.00
add additional for weights on preweighed PVC 27.00

**Basic metals scan dust** (Al, As, Cr, Cu, Fe, Mg, Mn, Ni, Pb, Zn) 86.00

**Basic metals scan fumes** (Al, As, Cr, Cu, Fe₂O₃, MgO, Mn, Ni, Pb, ZnO) 86.00

**Expanded metals scan dust** (Basic Scan metals plus: Be, Cd, Co, Mo, Sb, Ti, V) 125.00

**Expanded metals scan fumes** (Basic Scan fumes plus: Be, Cd, Co, Mo, Sb, Ti, V) 125.00

**Full metals scan dust** (Basic and Expanded Scan metals plus: Ba, Bi, B, Ca, Li, Se, Sr, Tl, Sn) 190.00

**Full metals scan fumes** (Basic and Expanded Scan fumes plus: Ba, Bi, B, CaO, Li, Se, Sr, Tl, Sn) 190.00

**WOHL Scans**

**Scan: Aldehyde Scan**  
Media: DNPH /Seppak  
(138) Cost: $315.00 per sample  
Analytes included:  
- Acetaldehyde  
- Acetone  
- Benzaldehyde  
- Butyraldehyde  
- 2,5-Dimethylbenzaldehyde  
- Formaldehyde  
- Hexanaldehyde  
- Isovaleraldehyde  
- Methyl Ethyl Ketone (MEK)  
- Propionaldehyde  
- m&p-Tolualdehyde  
- o-Tolualdehyde  
- Valeraldehyde

**Scan: PAH 5**  
Media: OVS-2 (4)  
Cost: $220.00  
Analytes included:  
- Anthracene  
- Benzo(a)pyrene  
- Chrysene  
- Phenanthrene  
- Pyrene

**Scan: PAH 11**  
Media: OVS-2 (4)  
Cost: $335.00  
Analytes included:  
- Anthracene  
- Benz(a)anthracene  
- Benzo(a)pyrene  
- Chrysene  
- Coronene  
- Fluoranthene  
- 3-Methylcholanthrene  
- Naphthalene  
- Perylene  
- Phenanthrene  
- Pyrene

**Scan: Alcohols**  
Media: Large Anasorb 747 (174)  
Cost: $205.00  
Analytes Included:  
- n-Butyl Alcohol  
- Ethanol  
- Isobutyl Alcohol  
- Isopropyl Alcohol  
- Methanol  
- n-Propanol  
- n- and sec-Butanol

**Scan: Acrylates**  
Media: (112)  
Cost: $205.00  
Analytes included:  
- Acetone  
- Alpha-Methyl Styrene  
- Methyl, Butyl & Ethyl Acrylate  
- Butyl Methacrylate  
- 2-Methoxyethyl Acrylate  
- 2-Ethyl Hexyl Acrylate  
- Ethyl Methacrylate  
- Methyl Methacrylate  
- Styrene

**Scan: Inorganic Acid Mist I**  
Media: acid mist tube (6)  
Cost: $120.00  
Analytes Included:  
- Hydrogen Fluoride (HF)  
- Hydrogen Chloride (HCl)  
- Hydrogen Bromide (HBr)  
- Nitric Acid  
- Phosphoric Acid  
- Sulfuric Acid

**Scan: Organic Acid Mist IV**  
Media: acid mist tube (6)  
Cost: $120.00  
Analytes included:  
- Acetic Acid  
- Butyric Acid  
- Citric Acid  
- Formic Acid  
- Propionic Acid
**Scan: Isocyanate**
Media: MDI filter (124)
Cost: $210.00
Analytes included:
- Hexamethylene Diisocyanate (HDI)
- Homopolymer of HDI
- Isophorone Diisocyanate (IPDI)
- Methylene Biscyclohexyl Isocyanate (DESW/HDMI)
- Methylene Bisphenyl Isocyanate (MDI)
- PAPI
- 2,4-Toluene Diisocyanate
- 2,6-Toluene Diisocyanate

The following can be done on Orbo 91 tube (45)
- Acetone
- Methyl Ethyl Ketone (MEK)
- Methyl Isobutyl Ketone (MIBK)
- Methylene Chloride
- 1,1,1,2-Tetrafluoroethane

**Scan: Amines**
Media: H$_3$PO$_4$ coated XAD-7 tube (63)
Cost: $156.00
Analytes included:
- Diethanolamine
- Ethanolamine (*Monoethanolamine*)
- Triethanolamine

**Scan: Low Molecular Weight Aliphatic Amines**
Media: H$_3$PO$_4$ coated XAD-7 tube (63)
Cost: $235.00
Analytes included:
- Diethylamine
- Dimethylamine
- Dimethylethylamine
- Ethylamine
- Methylamine
- Triethylamine
- Trimethylamine
Scan: Solvent Scan A
Media: Large (2) or small (1) charcoal tube,
Cost: $205.00
Analytes included:
- Acetone
- Benzene
- n-Bromopropane
- n-Butyl Acetate
- 1-Chloro-4-trifluoromethylbenzene (Chlorobenzo-trifluoride)
- Cyclohexane
- Cyclohexanone
- Diisobutyl ketone
- Ethyl Acetate
- Ethyl Alcohol (Ethanol)
- Ethyl Benzene
- Hexane n
- Isopropyl Alcohol (Isopropanol, 2-propanol)
- Isopropylbenzene (Cumene)
- Limonene
- Methyl Amyl Ketone n-
- Methyl Ethyl Ketone (MEK, 2-butanone)
- Methyl isobutyl ketone (MIBK, hexone, 4-Methyl-2-pentanone)
- Methylene Chloride
- Methyl Methacrylate
- Pentane
- 2-Pentanone
- Styrene
- 4-tert-Butyltoluene
- Tetrachloroethene (tetrachloroethylene)
- Toluene
- Total VOC as hexane (Naphtha, mineral spirits, Stoddard solvent)
- Trichloroethene (trichloroethylene)
- Trimethylbenzenes
- Xylenes
Scan: Solvent Scan B
Media: Large (2) or small (1) charcoal tube,
Cost: $205.00
Analytes included:
• 2-Butoxyethanol CAS: 111-76-2
• Butyl Carbitol CAS: 112-34-5
• Butyl Cellosolve Acetate CAS: 112-07-2
• Diethyl Carbitol CAS: 112-36-7
• Dimethyl Adipate CAS: 627-93-0
• Dimethyl Glutarate CAS: 1119-40-0
• Dimethyl Succinate CAS: 106-65-0
• Dipropylene Glycol Methyl Ether (DPGME) CAS: 34590-94-8
• 2-Ethoxyethanol CAS: 110-80-5
• Ethyl-2-pyrrolidone CAS: 2687-91-4
• Methyl Cellosolve CAS: 109-86-4
• 1-Methyl-2-Pyrrolidinone CAS: 872-50-4
• PG Methyl Ether Acetate (PGMEA) CAS: 108-65-6
• 2-Propoxyethanol CAS: 2807-30-9
• n-Propoxy Propanol CAS: 1569-01-3
• Propylene Glycol Butyl Ether CAS: 5131-66-8
• Propylene Glycol Ethyl Ether CAS: 1569-02-4
• Propylene Glycol Methyl Ether CAS: 107-98-2
Solvent Scan on TraceAir II 525 Organic Vapor Monitor

Cost: $205.00 for analysis and $15 for badge

Collection:
The sample is extracted with a 97:3 (v/v) Carbon disulfide:Benzyl Alcohol solution and analyzed by gas chromatography equipped with a flame ionization detector (GC-FID).

AT525 Badge has a faster uptake rate best for IAQ or concentrations <10 PPMs.

Analytes:

- 2-Butoxyethanol CAS# 111-76-2 – 5.4 ug/sample
- Acetone CAS# 67-64-1 – 3.2 ug/sample
- Benzene CAS# 71-43-2 – 3.4 ug/sample
- Bromopropane (1-) CAS# 106-94-5 – 5.4 ug/sample
- Butyl Cellosolve Acetate CAS# 112-07-2 – 5.2 ug/sample
- Chlorobenzene CAS# 108-90-7 – 4.4 ug/sample
- Chloroform CAS# 67-66-3 – 24 ug/sample
- Cyclohexane CAS# 110-82-7 – 5 ug/sample
- Cyclohexanone CAS# 108-94-1 – 4 ug/sample
- Ethanol CAS# 64-17-5 – 200 ug/sample
- Ethyl Benzene CAS# 100-41-4 – 3.4 ug/sample
- Isopropyl Alcohol CAS# 67-63-0 – 200 ug/sample
- Limonene CAS# 138-86-3 – 3.4 ug/sample
- Methyl Ethyl Ketone (MEK) CAS# 78-93-3 – 3.6 ug/sample
- Methyl Isoamyl Ketone CAS# 110-12-3 – 3.6 ug/sample
- Methyl Isobutyl Ketone CAS# 108-10-1 – 3.6 ug/sample
- Methylene Chloride CAS# 75-09-2 – 10.6 ug/sample
- Propylene Glycol Methyl Ether Acetate CAS# 108-65-6 – 5.6 ug/sample
- Pentane CAS# 109-66-0 – 10 ug/sample
- 2-Pentanone CAS# 107-87-9 – 3.2 ug/sample
- Propylene Glycol Methyl Ether CAS# 107-98-2 – 5.6 ug/sample
- Styrene CAS# 100-42-5 – 3.8 ug/sample
- Tetrachloroethene CAS# 127-18-4 – 6.4 ug/sample
- Toluene CAS# 108-88-3 – 3.4 ug/sample
- Total VOC as Hexane – 2.6 ug/sample
- Trichloroethene CAS# 79-01-6 – 5.8 ug/sample
- Xylene (Total) CAS# 1330-20-7 – 3.4 ug/sample
- n-Heptane CAS# 142-82-5 – 2.8 ug/sample
- n-Hexane CAS# 110-54-3 – 2.6 ug/sample
Solvent Scan on AT566 Organic Vapor Monitor

Cost: $205 for analysis, $13 for badge

Collection:
The sample is extracted with a 97:3 (v/v) Carbon disulfide:Benzyl Alcohol solution and analyzed by gas chromatography equipped with a flame ionization detector (GC-FID).

AT566 badge has slower uptake rates and best for 8 hour sampling.

Analytes:

- 2-Butoxyethanol CAS# 111-76-2 – 5.4 ug/sample
- Acetone CAS# 67-64-1 – 3.2 ug/sample
- Benzene CAS# 71-43-2 – 3.4 ug/sample
- Bromopropane (1-) CAS# 106-94-5 – 5.4 ug/sample
- Butyl Acetate (n-) CAS# 123-86-4 – 3.6 ug/sample
- Butyl Cellosolve Acetate CAS# 112-07-2 – 5.2 ug/sample
- Chlorobenzene CAS# 108-90-7 – 4.4 ug/sample
- Chloroform CAS# 67-66-3 – 24 ug/sample
- Cyclohexane CAS# 110-82-7 – 5 ug/sample
- Cyclohexanone CAS# 108-94-1 – 4 ug/sample
- Diisobutyl Ketone CAS# 108-83-8 – 6.4 ug/sample
- Ethanol CAS# 64-17-5 – 200 ug/sample
- Ethyl Benzene CAS# 100-41-4 – 3.4 ug/sample
- Isopropyl Alcohol CAS# 67-63-0 – 200 ug/sample
- Isopropylbenzene (Cumene) CAS# 98-82-8 – 3.4 ug/sample
- Limonene CAS# 138-86-3 – 3.4 ug/sample
- Methyl Amyl Ketone (MAK) CAS# 110-43-0 – 3.2 ug/sample
- Methyl Ethyl Ketone (MEK) CAS# 78-93-3 – 3.6 ug/sample
- Methyl Isoamyl Ketone CAS# 110-12-3 – 3.6 ug/sample
- Methyl Isobutyl Ketone CAS# 108-10-1 – 3.6 ug/sample
- Methyl Methacrylate CAS# 80-62-6 – 19.6 ug/sample
- Methylene Chloride CAS# 75-09-2 – 10.6 ug/sample
- Propylene Glycol Methyl Ether Acetate CAS# 108-65-6 – 5.6 ug/sample
- Pentane CAS# 109-66-0 – 10 ug/sample
- 2-Pentanone CAS# 107-87-9 – 3.2 ug/sample
- Propylene Glycol Methyl Ether CAS# 107-98-2 – 5.6 ug/sample
- Styrene CAS# 100-42-5 – 3.8 ug/sample
- Tetrachloroethene CAS# 127-18-4 – 6.4 ug/sample
- Toluene CAS# 108-88-3 – 3.4 ug/sample
- Total VOC as Hexane – 2.6 ug/sample
- Trichloroethene CAS# 79-01-6 – 5.8 ug/sample
- Xylene (Total) CAS# 1330-20-7 – 3.4 ug/sample
- n-Heptane CAS# 142-82-5 – 2.8 ug/sample
- n-Hexane CAS# 110-54-3 – 2.6 ug/sample
GC Pesticides by modified EPA 8081 and OSHA 62, 67, 70

Collection:
These analytes can be collected on an OVS-2 (SKC 226-58). The sample is extracted with Toluene and analyzed by gas chromatography equipped with an electron capture detector (GC-ECD) or flame ionization detector (GC-FID). The recommended flow rate is 1.0 LPM for 60 to 480 minutes (60-480 L). The fee for a Pesticide scan is $400.00/sample plus $13.00 OVS-2 media charge.

Analytes included in Pesticide Scan:
1. Aldrin (CAS#: 309-00-2) – 10 ng
2. alpha-BHC (CAS#: 319-84-6)
3. beta-BHC (CAS#: 319-85-7)
4. delta-BHC (CAS#: 319-86-8)
5. gamma-BHC (Lindane) (CAS#: 58-89-9)
6. cis-Chlordane (CAS#: 5103-71-9)
7. trans-Chlordane (CAS#: 5103-74-2)
8. p,p-DDD (CAS#: 72-54-8) – 10 ng
9. p,p-DDE (CAS#: 72-55-9) – 10 ng
10. p,p-DDT (CAS#: 50-29-3) – 10 ng
11. Dieldrin (CAS#: 60-57-1) – 10 ng
12. Endosulfan I (CAS#: 959-98-8)
13. Endosulfan II (CAS#: 33213-65-9)
14. Endosulfan sulfate (CAS#: 1031-07-8)
15. Endrin (CAS#: 72-20-8) – 10 ng
16. Endrin aldehyde (CAS#: 7421-93-4)
17. Endrin ketone (CAS#: 53494-70-5)
18. Heptachlor (CAS#: 76-44-8) – 10 ng
19. Heptachlor epoxide (CAS#: 1024-57-3) - 0.2 ug
20. Methoxychlor (CAS#: 72-43-5)

Individually requested analytes:
The fee for an individual analyte is $110/sample -1st analyte; each additional is $60/sample

1. Bifenthrin – 10 ng
2. Captan (CAS#: 133-06-2) – 10 ng
3. Chlorethoxyfos (CAS#: 54593-83-8) – 0.2 ug
4. Chlorothanlonil (CAS#: 1897-45-6) – 10 ng
5. Chlorpyrifos (CAS#: 2921-88-2) – 10 ng
6. Cyfluthrin (CAS#: 68359-37-5) – 10 ng
7. Cypermethrin (CAS#: 52315-07-8) – 0.3 ug
8. Deltamethrin (CAS#: 52918-63-5) – 1 ug
9. Diazinon (CAS#: 333-41-5) – 10 ng
10. Dichlorvos (CAS#: 62-73-7) – 10 ng
11. Dimethoate (CAS#: 60-51-5) – 0.2 ug
12. Esfenvalerate (CAS#: 66230-04-4) – 1 ug
13. Ethyl Parathion (CAS#: 56-38-2) – 10 ng
14. Fipronil (CAS#: 120068-37-3) – 10 ng
15. Imidacloprid (CAS#: 138261-41-3) – 10 ng
16. Malathion (CAS#: 121-75-5) – 10 ng
17. Metofluthrin (CAS#: 240494-70-6) – 0.2 ug
18. Metribuzin (CAS#: 21087-64-9) – 10 ng
19. Pendimethalin (CAS#: 40487-42-1) – 10 ng
20. Permethrin (CAS#: 52645-53-1) – 1 ug
21. Permethrin (CAS#: 52645-53-1) – 1 ug
22. Propiconazole (CAS#: 60207-90-1) – 1 ug
23. Tebuconazole (CAS#: 107534-96-3) – 1 ug
24. Tefluthrin (CAS#: 79538-32-2) – 10 ng
25. Tetramethrin (CAS#: 7696-12-0) – 10 ng
26. Thiamethoxam (CAS#: 1537-23-4) – 10 ng
27. Trifluralin (Treflan) (CAS#: 1582-09-8) – 10 ng
A variety of metals can be collected on the same filter; however, some need to be collected separately due to solubility differences. Please call the lab if you have questions about which metals can be collected together. Pricing for ICP analysis is as follows: The first metal on a filter is $38. Each additional metal on the same filter is $8. For special metals such as mercury and silver, please see the alphabetical listing. There is an additional $10 prep charge per sample for bulks. Please note that oxide compounds cannot be determined specifically. The metal content is determined and a conversion factor is applied. The ICP determines metal content, which may or may not include all compounds of that metal. If you are interested in metal oxides, you should call the lab to determine the best sampling strategy.
