

September is Newborn Screening Awareness Month

Did you know all babies in Wisconsin should be tested at birth for 44 serious disorders, plus hearing loss, and critical congenital heart disease?

Ask your baby's
health care
provider for your
baby's newborn
screening test
results.

**These Tests Could
Save Your Baby's
Life! Baby may
look healthy, but
you won't know
unless you test.**

For more information, visit the Wisconsin Newborn
Screening website at

www.slh.wisc.edu/clinical/newborn

Or call the Wisconsin Newborn Screening Program
Coordinator at 608-266-8904.
