

September is Newborn Screening Awareness Month

These Tests Could Save Your Baby's Life! Baby may look healthy, but you won't know unless you test.

Ask your baby's health care provider for your baby's newborn screening test results.

Did you know all babies in Wisconsin should be tested at birth for 44 serious disorders, plus hearing loss, and critical congenital heart disease?

For more information, visit the Wisconsin Newborn Screening website at

<http://www.slh.wisc.edu/clinical/newborn>

Or call the Wisconsin Newborn Screening Program Coordinator at 608-266-8904.
