Program

This one-day meeting presented by the Wisconsin State Laboratory of Hygiene (WSLH) offers clinical and public health laboratorians, infection preventionists and local public health department staff the chance to strengthen their relationships through networking and discussions of relevant laboratory issues.

This year's meeting is the 3rd and final year focused on improving laboratory biosafety and biosecurity. We will roll out a revised risk assessment tool that will be utilized to analyze our progress on improving the culture of biosafety in Wisconsin laboratories. We will also discuss the importance of incorporating a biosafety plan into laboratory safety. Other topics that will round out the day are a discussion of strategies for *C. difficile* testing and case studies.

We have structured the day so that our guests from infection prevention and local public health may choose to leave when the presentations become more focused on laboratory issues later in the day.

Target Audience

This meeting is intended for all laboratory scientists. We especially want to encourage laboratory management to attend along with bench techs as we work to improve the culture of biosafety and biosecurity in our WI laboratories. **We also invite infection preventionists and local public health department staff to join the laboratorians** to enhance communications among the laboratory, infection prevention, and public health communities.
