Program

This one-day meeting presented by the Wisconsin State Laboratory of Hygiene (WSLH) offers clinical and public health laboratorians, infection preventionists, and local public health staff the chance to strengthen their relationships through networking and discussions of relevant laboratory issues.

This year's meeting concludes our biosafety grant funding and it is now time to determine whether or not we've been successful in improving the culture of laboratory biosafety in WI. We will share the results of the risk assessment tools that were completed and returned to us. We will also discuss the importance of continual emergency preparedness and raise the question "What is the minimal level of preparedness that a laboratory is expected to maintain?" Updates to the Reportable Conditions List, the ARLN, and WSLH Surveillance are also on the agenda. We will round out the day with everyone's favorite topic "Case Studies".

We have structured the day so that our guests from infection prevention and local public health may choose to leave after lunch, when the presentations become more focused on laboratory issues.

Target Audience

This meeting is intended **for all laboratory scientists**. We especially want to encourage **both laboratory management and bench technologists** to attend, as we work to improve the culture of biosafety and biosecurity in our WI laboratories. In addition we hope you will extend an invitation to your facility **infection preventionists** to join us. We also invite **local public health staff** to join the laboratorians to enhance communications among the laboratory, infection prevention, and public health communities.
