

WASTEWATER-BASED EPIDEMIOLOGY PUBLIC FORUM

YOU'RE INVITED!

Join the Water Environment Federation and the New York and Wisconsin wastewater public health monitoring programs at a forum to:

- Learn how sewage can help protect public health
- Hear from national and local experts
- Ask questions and join the conversation

WHAT TO EXPECT:

- Welcome & Overview
- Wastewater Surveillance 101
- National Success Stories
- Panel Discussion: Perspectives on Program Success
- Audience Q&A

WHAT IS WASTEWATER-BASED EPIDEMIOLOGY ANYWAY?

It's a clever community-based public health approach that involves measuring human pathogen markers in untreated sewage (yes, you read that right!). You'll be amazed to learn how many serious diseases can be monitored in wastewater and how this method can be used not just at the community level, but even at major events like the 2025 NFL Draft.

JULY 9, 2025 | 7:00-8:30 PM CDT
