

New General Test Requisition Form

The Wisconsin State Laboratory of Hygiene Communicable Disease Division (CDD) has released a **new General Test Requisition Form**, which **replaces the previous Form A and Form B**. This new form reduces the number of forms your facility needs to maintain, improves clarity and organization, and has been updated with our currently available tests and test codes. This paper form is used by submitters across Wisconsin for CDD testing.

Please note:

- This form **does not include all available tests**—please refer to the [WSLH Test Directory](#) for the most comprehensive and up-to-date test information.
- Other requisition forms remain in use for specific purposes (e.g., Outbreaks, surveillance, STDs, rabies, etc.). Continue to use these forms as needed.

Action Required:

- **Discard old versions** of Form A and Form B.
- Begin using the **new General Test Requisition Form**.

How to obtain the new form:

- WCLN labs will receive the new form, pre-populated with your submitter information, in our WCLN **annual surveillance mailer** within the next few weeks.
- Forms may also be requested by calling **Customer Service** (1-800-862-1013).

Thank you for your cooperation as we continue to improve our processes and support public health testing statewide.
